

Social Dreaming Matrix

Social Dreaming will be used in this workshop series as a method to explore contemporary issues and current affairs. Our dreams carry not just individual meaning, but also apply to the larger context of the world in which we live. Social Dreaming explores the thinking and cultural knowledge contained in dreaming and the primary task of a Social Dreaming Matrix is to transform thinking through the exploration of dreams with the help of free association, amplification and systematic thinking. By focusing on the dreams, not the dreamer, links are made and new connections are found.
